Built-Up Pocket Door Frames

1000 Series

For 1 1/8" to 1 3/8" Doors
Maximum Door Weight 200 lbs.

Pocket Door Frames

Open up rooms, creates more space and provides privacy. You can do it all with A&F Wood Products Pocket Door Frames. Where a "traditional swinging" door would use up too much space, pocket doors fit right in to solve room planning problems. You get more usable space, more flexibility and better appearance. Installation is approximately 10 minutes, using just a few basic tools.

Pocket Door Hardware

A&F Wood Products offers a three wheel ball bearing hanger system. This will hold up to 200 lbs.

Pocket Door Options

Miscellaneous options are available to customize your Pocket Door Frames. You can order separately Mullion Kits, Extension Kits, Jamb Kits and more. Stock is available in 4/0 widths, 7/0 & 8/0 heights as well as options for 2x6 walls, 5/8" drywall, and 13/4" doors.

Built-Up Frames

Fully assembled for quick and easy installation. All frames are designed to hold up to 200 lbs. for a standard 6'8" door.
